

共拓云端，连接上云

主讲人：苏远超/思科首席工程师

数字化转型对企业IT/云的冲击

共拓云端: 使能更丰富的VPC服务

云市场

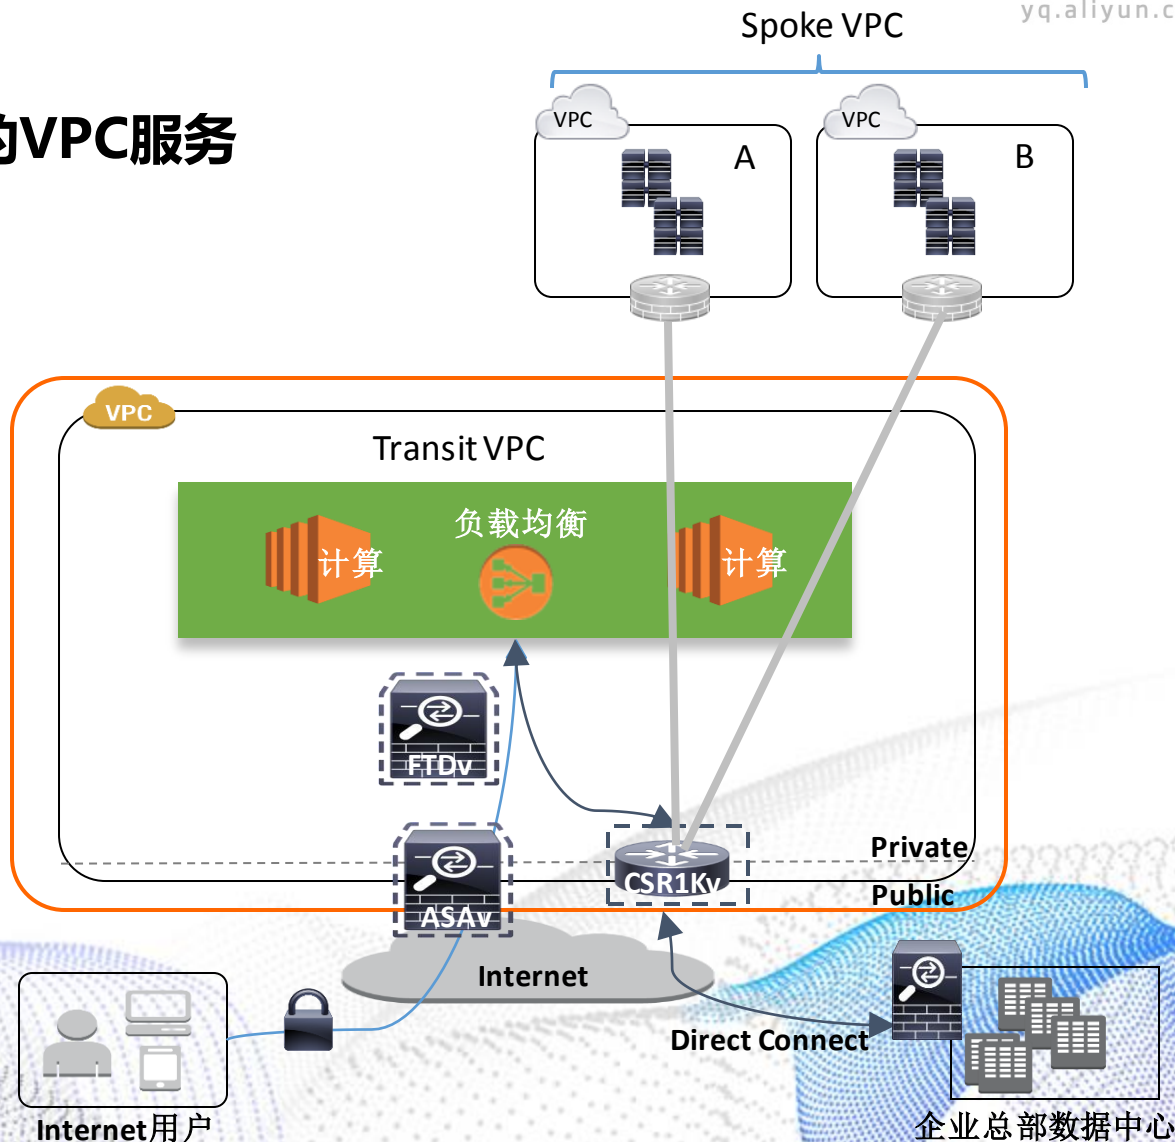

虚拟路由器
CSR1KV

虚拟防火墙&VPN网关
ASAv

虚拟NGFW&IPS
FTDv

共拓云端: 助力新的业态-容器/微服务

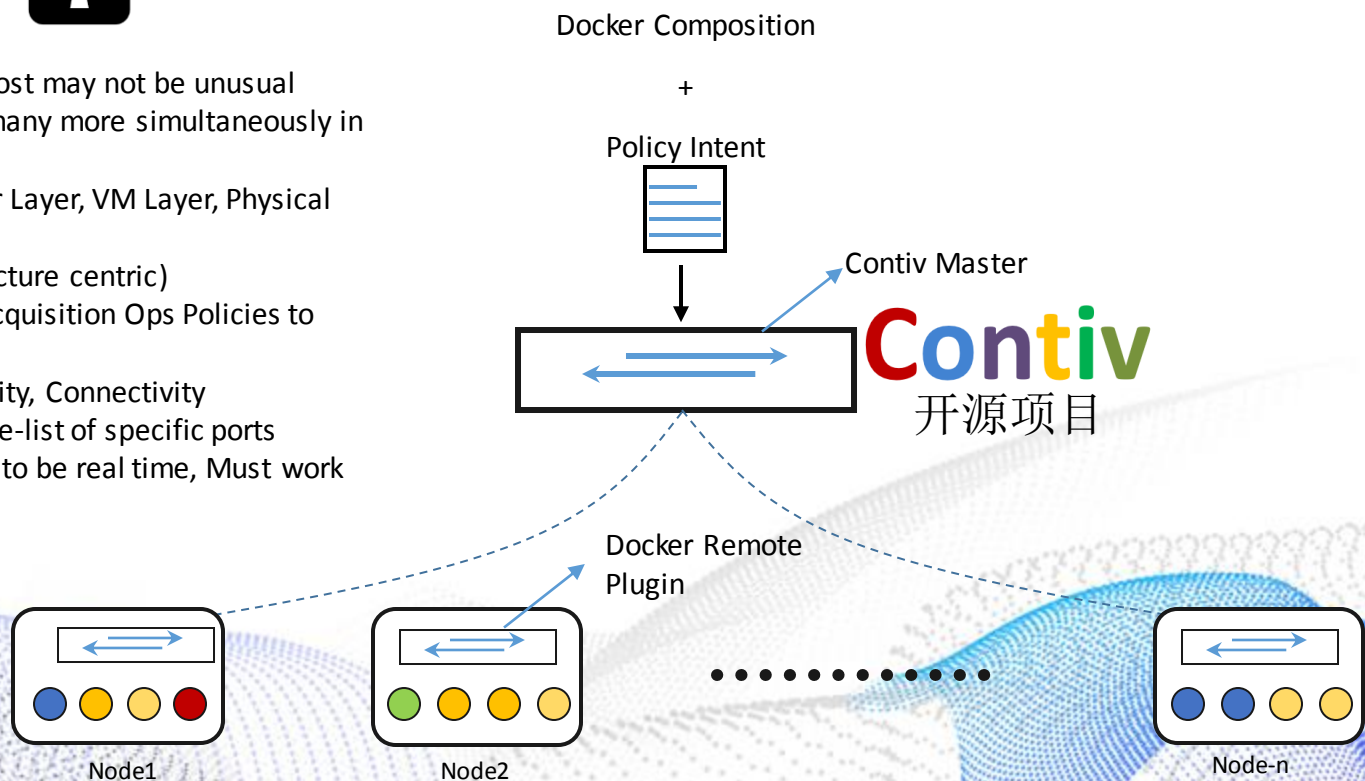

网络

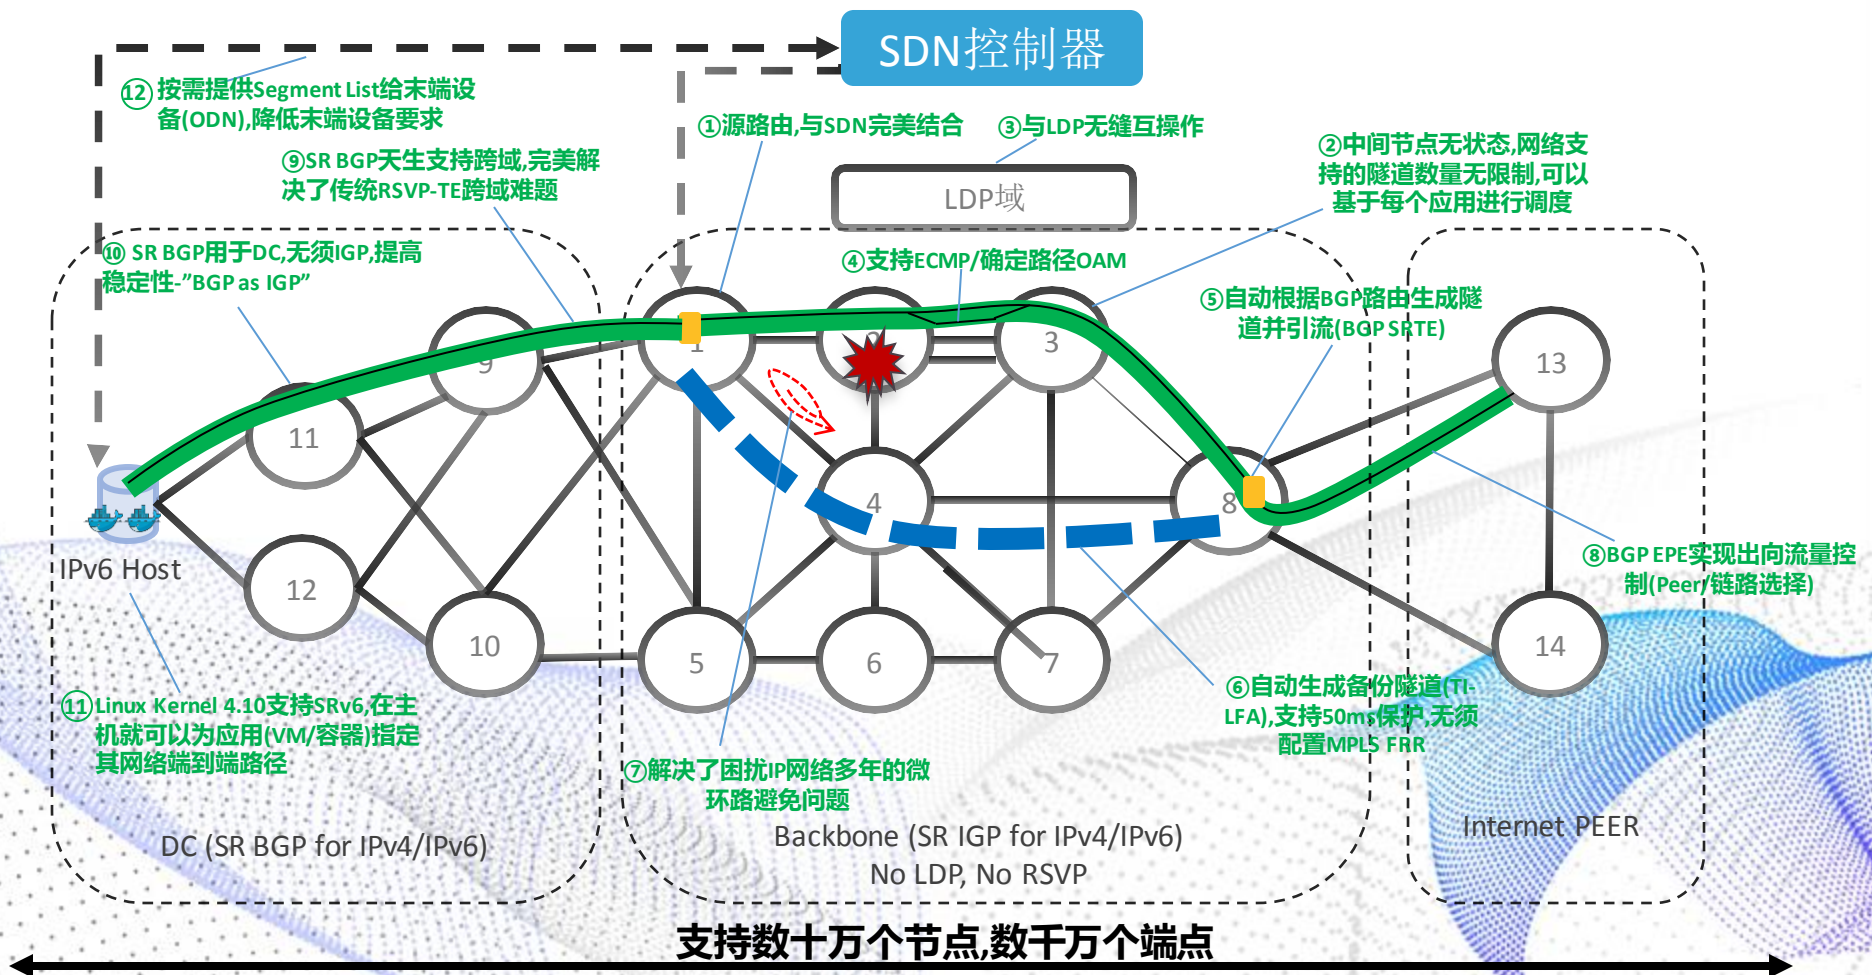

安全

1. Scale: 200-500 containers per host may not be unusual
2. Speed: Comes up in a second (many more simultaneously in a cluster)
3. Layers of Networking: Container Layer, VM Layer, Physical Layer
4. Application Centric (vs. Infrastructure centric)
5. Shared Resources – Resource Acquisition Ops Policies to define deployment structure
6. Hybrid Cloud Consistency, Security, Connectivity
7. Security Tenancy, Isolation, white-list of specific ports
8. Telemetry and Diagnostics Need to be real time, Must work at the scale/speed

共拓云端: 构建云级网络

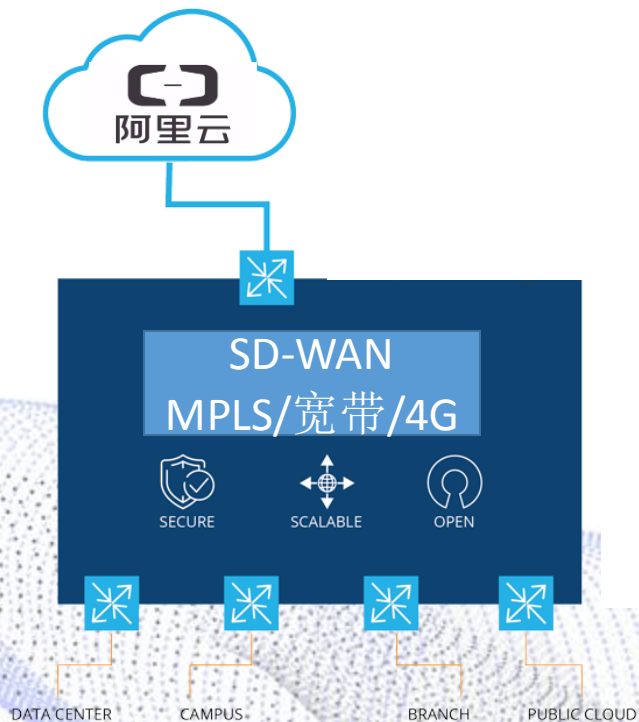

Segment Routing支持超大规模云互联和智能云调度

连接上云:提供更智能的接入, 催生新的商业模式

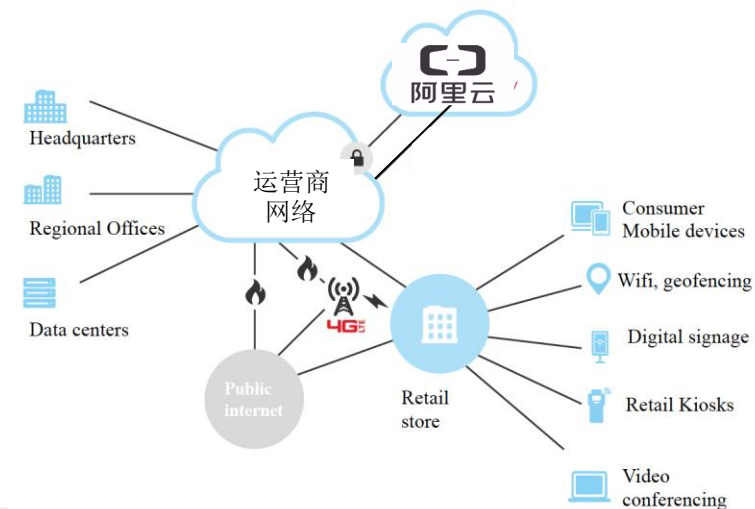

SD-WAN提升云接入质量

- 与接入方式无关的智能&安全Fabric
- 可针对IaaS/SaaS进行广域网动态选路

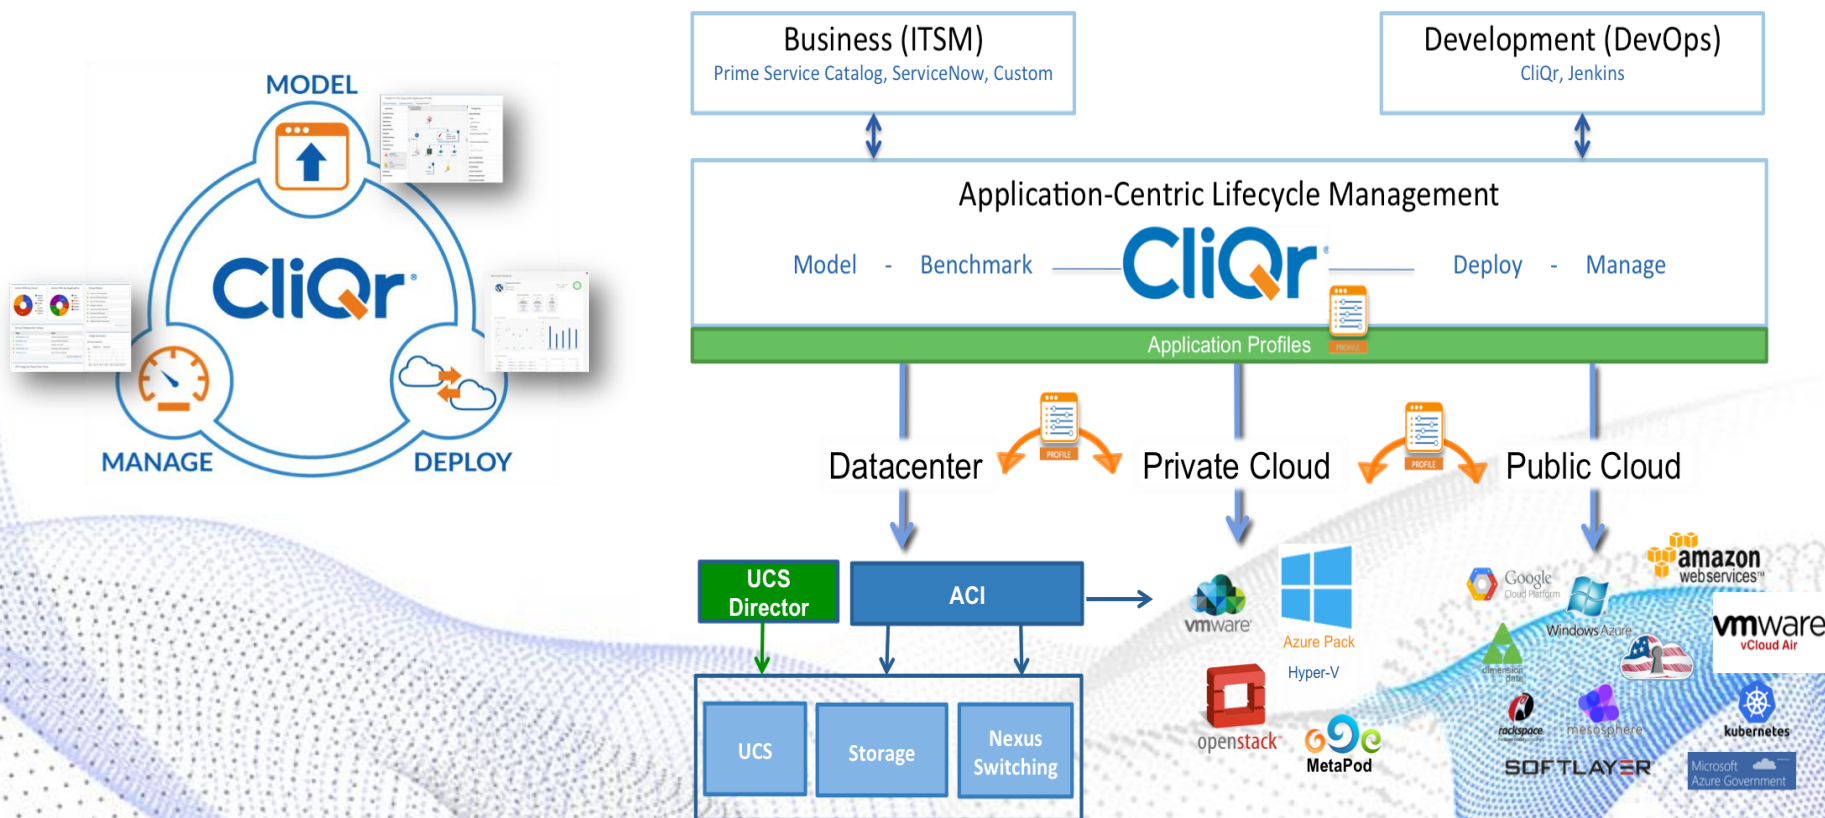

催生新的商业模式

- 云提供商与运营商合作提供数字化解决方案

连接上云:混合云自动化

CloudCenter让更多企业更容易地把更多负载从私有云迁移到公有云
